DETAILED ACTION

Applicant's arguments with respect to claims 1-56 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 is rejected under 35 U.S.C. 102(b) as being anticipate by U.S. Patent No. 5,557,544 to Simon et al. (Simon).

Simon discloses an optical system that uses exchangeable components, probes, comprising means for detachably mounting at least one of a plurality of optical components, probes, a recognition component (col. 3 – col. 4) for recognizing the type of component mounted; and a control device fro controlling the component.

Claims 2-56 are allowable over the prior art, because the prior art fails to disclose, scanning probes claimed.
